

Ishaan Fartyal

Eindhoven, Netherlands | +31645965490 | [Email](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Final-year BSc Mechanical Engineering student at TU/e with experience in cost engineering, lifecycle analysis, Python-based analytics and mechanical design. Completed a bachelor’s thesis in thermo-fluid engineering and particularly interested in the intersection between engineering and technology management, strategy and business analysis.

EDUCATION

BSc Mechanical Engineering — Eindhoven University of Technology (TU/e) <i>Product Development & Entrepreneurship Elective Line (8 8 8)</i> Relevant Coursework: Dynamics of Energy Systems (9) Solid Mechanics (8) Multipled Robot (8) Bachelor’s Thesis: Determining an optimal transition plane in gas atomization simulations (Thermo Fluids Engineering)	Expected Nov 2026 Eindhoven, Netherlands
K. International School in Tokyo (KIST) – IB Diploma 43/45 Physics HL 7 Mathematics AA HL 7 Economics SL 7	Jun 2021 Tokyo, Japan

EXPERIENCE

Cost Engineer — University Racing Eindhoven (URE) <i>Formula Student engineering team</i> - Developed and maintained detailed Bills of Materials (BOM) and Costed-Carbonized Bills of Materials (CCBOM) of a race car to evaluate component costs and lifecycle emissions across manufacturing and distribution. - Built an Excel cost model comparing prototype and mass-production scenarios for the inverter, evaluating in-house manufacturing and assembly versus outsourcing across production volumes to identify cost break-even points and sourcing implications. - Assessed cost and carbon implications of component and manufacturing choices, translating engineering decisions into financial and sustainability trade-offs.	Sep 2025 – Aug 2026 Eindhoven, Netherlands
Mechanical Design Engineer — University Racing Eindhoven (URE) <i>Formula Student engineering team</i> - Designed an in-wheel motor assembly for a race using Siemens NX, translating design requirements, preferences, and constraints into a detailed CAD assembly. - Evaluated packaging, manufacturability and integration constraints with vehicle sub-teams, iterating the design around technical and production limitations.	Sep 2024 – Aug 2025 Eindhoven, Netherlands

SELECTED WORK [↗](#)

ASML Strategy Analysis <i>Independent Project</i> - Conducted an independent strategy analysis of ASML, combining industry structure, financial performance, technology trends, and supply-chain risk to assess the durability of its competitive advantage. - Evaluated strategic options around High-NA EUV commercialization, recurring installed-base revenue, and supplier resilience, and developed a prioritized recommendation for sustaining long-term market leadership.	Sep 2026
Finsight — Python-based Personal Finance Analytics App <i>Independent Project</i> - Built a Python and Streamlit app that converts user-uploaded bank-statement CSVs, detects supported formats and delimiters, and normalizes transactions through dedicated bank parsers and an additional generic fallback parser. - Developed pandas-based analytics and rule-based categorization to calculate key metrics including income, expenses, savings rate, category spending and monthly trends, and presented these insights in an interactive dashboard.	Sep 2026

ACTIVITIES

E.S.K.B.V. Impact E.S.B.V. Samourais <i>Student Athlete</i> Actively involved in the student Boxing/Kickboxing and Judo associations.	2024 – Present
Japan U19 National Cricket Team — ICC Under-19 Cricket World Cup <i>International Athlete</i> Selected to represent Japan at the ICC Under-19 Cricket World Cup, competing in an international high-performance team environment.	2020

SKILLS & ADDITIONAL INFORMATION

Technical Skills: MATLAB Python Siemens NX Excel Arduino	Awards: Silver Award Scholarship (2021)
Business Skills: Cost Modelling Technology Strategy Scenario Analysis Financial / Operational Analysis	Languages: English — Native Japanese & Hindi — Professional Working Proficiency Dutch – Elementary
Work Authorization: Eligible for Dutch Orientation Year (Zoekjaar) upon graduation.	Certifications: Corporate Finance Foundations – CFI, Sep 2026
